Highview were appointed to carry out investigations and repairs to the deck of the Aitrose Leisure Centre. The investigations identified the cause of the water ingress and the necessary repairs were carried out. The repairs were completed in a timely manner and the deck was waterproofed.

On completion of these investigations we were then instructed to carry out all the required repairs to the deck prior to the installation of the Aitrose Leisure Centre waterproofing system.

The project was extremely time sensitive due to this being a live shopping centre with works programmed around the busiest periods for shoppers.

This was our first scheme with a new client and led onto a number of additional schemes.
